EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claim 281 is allowable because the prior art of record does not disclose or reasonably suggest the claimed process and circuit of multiple description data partitioning, where fixed codebook pulses are partitioned between primary and secondary stages of sequential packets, and where a packet includes a parameter of parity check data. It is known to send packets of speech data including linear prediction coefficients, long term prediction (or pitch) lag, adaptive and fixed codebook gains, and adaptive and fixed codes for Voice over Internet Protocol (VoIP). Moreover, some applications include parity bits to check for transmission errors. Generally, though, it is not disclosed or reasonably suggested by the prior art to partition fixed codebook pulses between packets. Specifically, the prior art of record does not disclose the limitations of independent claim 281, where only Linear Prediction Coding data, Long Term Prediction lag data, parity check data, and adaptive and fixed codebook gain data are included in a secondary stage of a second packet, implying that fixed codebook pulse data is excluded from the secondary stage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
